

Your illness is a very small part of you.

You are an individual with a unique personality, talents, and skills which are valuable to yourself and others.

COMPREHENSIVE COMMUNITY SERVICES (CCS) PROVIDER DIRECTORY

CCS Frequently Asked Questions (FAQs)

What Is CCS?

CCS is a Medicaid program offered by Milwaukee County that focuses on helping individuals with mental health and/or substance abuse conditions recover from their illnesses and obtain their personal goals and life vision. The program is available for both children and adults residing in Milwaukee County.

What Can CCS Offer Me?

The CCS program offers a wide range of services and service providers that you have the ability to choose from. It is your right as a CCS participant to be informed of all of the services available to you and to have the opportunity to pick and choose what services and services providers you would like to receive services from.

How Long Will It Take Before I Start Receiving Services?

From the date that you sign the initial CCS service application, you have 30 days to complete the enrollment process and start receiving CCS services. How fast the enrollment process occurs is really up to you and how quickly you are willing to work on enrolling. If you have pending obligations that may impact your ability to complete your CCS enrollment in the next 30 days, we ask that you address your obligations first and start the enrollment process at a later date and time that works better for you.

What Is A Care Coordinator?

The CCS Care Coordinator (CC) is your primary point of contact after you complete the Intake Process and are found eligible for CCS. Your CC is the member of your Recovery Team who helps you identify your goals, helps you figure out the best ways (via services, providers and natural supports) to accomplish those goals and maintains contact with you in order to be ensure you are happy with your team and progressing toward your ultimate life vision. You have the opportunity to select which agency you would like to receive care coordination services from, as long as that agency has current availability.

My Care Coordination Agency Offers Many of the Services I Want...

If you would like to receive all your services from one agency, it is your right to do so. We just want you to be aware that the CCS Provider Network is large and offers many specialized services outside of what your care coordination agency may have available. When entering the CCS program, we strongly encourage CCS participants to review the CCS Provider Directory so that they are aware of what services and service providers are available to them.

What If I'm Seeing a Therapist Who is Not in the CCS Network?

Unfortunately, if you are receiving psychotherapy services, the CCS program requires that you see a therapist in the CCS network. If you are not sure if your therapist is in the CCS network please ask your CCS intake and/or care coordinator.

How long can I be in CCS?

As long as you have Medicaid, and continue to meet the functional and diagnostic eligibility requirements of CCS, you can continue to participate in the program as long as you would like. Once found eligible the CCS program your care coordinator will re-evaluate your eligibility on a yearly basis.

What If I Don't Want to be in CCS anymore?

CCS is a voluntary program. This means you can stop participating at any time. If you are no longer interested in being in the CCS program, all you have to do is let your care coordinator know. It is important for you to be aware that if you don't inform your care coordinator that you are done participating in CCS services, they have to try contact you for up to 90 days after you stop communicating with them. This may include phone calls, home visits, etc. This is a lot of work for them and may become annoying for you. If you want to leave CCS, it is your decision and we respect that. Please let your care coordinator know if you no longer want to be in the program.

I Left the CCS Program, but I want to come back in?

As long as you continue to meet the eligibility requirements for CCS, you can reapply to participate in the program at any time.

CARE COORDINATION										
The CCS Care Coordinator (CC) is your primary point of contact after you complete the Intake Process and are found eligible for CCS. Your CC is the member of your Recovery Team who helps you identify your goals, helps you figure out the best ways (via services & providers) to accomplish those goals and maintains contact with you in order to be sure that you are happy with your team and progressing towards your ultimate "Life Vision."

DIAGNOSTIC EVALUATION									
If you need additional testing to help you gain a better understanding of what may be causing some of the symptoms and/or issues you are experiencing, CCS can help you get the testing you need. Covered evaluations under this category include, but are not limited to: neuropsychological testing, occupational therapy evaluations, health assessments (provided by a qualified RN), etc. CCS does not cover tests related to autism, developmental or learning disabilities.

MEDICATION MANAGEMENT- PRESCRIBER SERVICES									
CCS prescribers help to diagnosis and treat psychiatric symptoms and/or behaviors that impact your ability to successfully reach your goals. If you or a member of your recovery team feel that medications may be helpful in reducing the symptoms you are experiencing, a prescriber may work with you to explore what medications are available for you to take. Your prescriber can help you develop strategies to support you in taking your medications, increase your understanding of the medications you are taking and the symptoms they are intended to treat, and improve your ability to identify potential medication side effects.

MEDICATION MANAGEMENT- NON PRESCRIBER SUPPORTS										
Providers that do not directly prescribe medications can also assist you with medication management. Services that fall under the non-prescriber category include: developing strategies to support you with taking your medications as prescribed (i.e. reminding you to take medications, supporting you with setting up your medication boxes, etc.), working to increase your understanding of the medications you are taking and the symptoms they are intended to treat, and monitoring changes in your symptoms and tolerance to side effects.

PHYSICAL HEALTH MONITORING									
If you have a medical condition (i.e. diabetes, heart related issues, breathing disorders, etc.) that is difficult to manage due to your mental health and/or substance abuse, someone can assist you in learning about your medical condition(s) and how to better manage your physical health. Services may include assisting and training you and/or your natural supports to: identify symptoms of physical health conditions, monitor physical health medications and treatments, and develop other skills that will help monitor and manage your physical health. This service can be provided in an individual or group setting.

PEER SUPPORT SERVICES											
Peer Support services can offer a wide range of supports to assist you and your family in better understanding and coping with a mental health and/or substance abuse condition. Peer Support Specialists have personal experience living with a mental health and/or substance abuse issue. When working with a peer support specialist, they can share with you their own journey and strategies that have supported them in being successful within their own recovery. A Peer Support Specialist can support you in navigating systems of care with dignity and without trauma, access available resources, develop skills that will help you reach your goals, and offer you a therapeutic relationship with a peer that is equal and mutually empowering. Note: Co-Occurring means individuals having lived experience with both mental health and substance abuse related conditions.

INDIVIDUAL SKILL DEVELOPMENT AND ENHANCEMENT										
Individual skill development and enhancement is a service category that offers a wide range of supports. Services that fall under this category include improving your ability to: advocate for your needs, communicate better with others, problem solving, decision-making, managing your emotions, resolving conflict, developing natural support systems, and addressing any other social needs you may have. Another focus of this service category is to work on developing skills that will improve your ability to take care of yourself and others. This can include: learning strategies to help you improve your personal cares (hygiene, laundry etc.), taking care of your home, managing your finances, riding the bus and/or accessing other forms of transportation, shopping, parenting, employment and education related skill development (if offered by anyone that is not an approved Individual Placement and Support (IPS)- Supported Employment provider-see Employment Related Skill Training section for details) and any other specific daily living needs you may have.

EMPLOYMENT/EDUCATION RELATED SKILL TRAINING

For CCS, Employment Related Skill Training is strictly offered by agencies that are using specialized, effective models of supported employment. It is widely understood that employment often plays an important role in one's recovery. As a result, Milwaukee County's CCS program has adopted the use of the Individual Placement and Support (IPS) Supported Employment model. IPS requires an employment specialist to be a part of your care coordination team. If you decide that you would like to work on employment and/or education related goals, the employment specialist can work with you, your care coordinator, and anyone else you identify on the recovery team to support you in finding and keeping a job (or participating in an education program). The focus of this approach is get people working in the general workforce, doing jobs that they both enjoy and want to do, rather than working in sheltered workshops and in positions that are paid less than average wages. In addition, this model allows for the employment specialist to provide ongoing supports (as needed) to help you keep your job as long as you feel it is necessary.

Services may include but are not limited to: employment and education related assessments; assistance in accessing or participating in educational and employment related services; education about appropriate job-related behaviors; assistance with job preparation activities such as personal hygiene, clothing, and transportation; onsite employment evaluation and feedback sessions to identify and manage work-related symptoms; assistance with work-related crises; and individual therapeutic support. **IMPORTANT: You can only access Employment and Education Related Skill Training through a care coordination agency that offers it. Other care coordination agencies, without IPS, can offer employment/education related services, but these services do not fall under this category.**

INDIVIDUAL AND FAMILY PSYCHOEDUCATION											
Psychoeducation services include providing: education and informational resources, emotional and social support, skills training, problems solving, and guidance related to managing your mental health and/or substance abuse condition. Psychoeducation may be provided individually or in a group setting to you, your family and/or natural supports. Psychoeducation is not psychotherapy. Family psychoeducation must be provided for your direct benefit and with your consent. Consultation to family members for treatment of their issues, not related to yours, aren't included as part of family psychoeducation.

PSYCHOTHERAPY											
<p>Psychotherapy is a form of "talk therapy" intended to support you in the achievement of your recovery goals and ultimately help you to improve your quality of life, enhance your satisfaction in relationships, and improve your participation and performance in both work and leisure activities. Psychotherapists can diagnose and treat mental, emotional, and/or behavioral disorders, conditions, or addictions by applying the use of established treatment approaches. The goal of psychotherapy is to support individuals in modifying their behaviors, thoughts, emotions, and other personal characteristics, which may be impact their ability to function. Psychotherapy may be provided in an individual or group setting. IMPORTANT: While you are enrolled in CCS, if you would like psychotherapy services, you are required to see a CCS approved therapist.</p>

SUBSTANCE ABUSE TREATMENT									
Substance abuse treatment services include day treatment and outpatient substance abuse counseling. Substance abuse treatment services can be provided individually or in a group setting. The CCS program does not cover Operating While Intoxicated assessments, urine analysis and drug screening, detoxification services, medically managed inpatient treatment services, or narcotic treatment services (opioid treatment programs). Some of these services may be covered under Medicaid outside of the CCS program.
